

The New Standard for Mix Counter by REIS

Reliability In Mixed Coin Counting

Reliable counting of small and medium volumes of mixed coins seems to be an easy task, but it is not, by far. Therefore many of the low price products do not properly respond to the needs of the professional users in terms of exactness, reliability and duration.

GLORY and REIS exactly know the requirements of banks and cash centres. Combining their skills in professional cash handling, as well as design, development, coin detection and volume production of machines, they created this new Mix Counter. The machine looks nearly unchanged, simply because the shape has proved itself.

The user interface is modern with a LC-display and dust-resistant keys.

Four standard languages (German/English/French/Spanish), other languages optional on request.

The backbone, the Reis Coin Detection System was completely redeveloped. The recognition capability has reached the limit of what is technically feasible.

The new ergonomic user interface allows faster and more simple inputs and better recognition of counting results. The choice of new materials results in more environmental friendly components.

Reis has developed this new quality solutions for coin counting. New Mix Counter CC 1302 offers real value for money.

Benefits And Improvements

- Reliable coin detection through digital technology
- Highest accuracy through improved manufacturing technique
- Simpler handling through bigger input shutter
- Reduced noise level through new plastics components
- Environmental friendly through recyclable materials
- Secure operation through new keyboard and LC-display

New Mix Counter CC 1302 is the perfect coin counter for the teller area and back office in all banks. Excellent ergonomics and highest robustness make it the ideal tool for all cash centres.

- Secure
- Reliable
- Durable
- Cost saving

Specifications

Recognition:	Up to 9 coin values per currency, 3 currencies
Exit Hoppers:	separate reject pocket with overflow control
Sorting Speed:	Up to 600 coins/min 15 - 33 mmø
Coin Recognition:	RCDS 3 / RCDS 4 (optional)
Power Supply:	220-240 V, 50 Hz 100-120 V, 60 Hz
Power Consumption:	approx. 100 W
Noise Level:	70 dB (A)
Printer:	external, optional
Additional Display:	external, optional
Dimensions (W x H x D):	422 x 361 x 302 mm
Weight:	approx. 20 kg
